

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 September 2026
Team ID	SWTID-2026-4452
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected problem focus: Importing bulk employee spreadsheet data into ServiceNow accurately while avoiding duplicate records and providing clear visibility into import and employee data.

Step-2: Brainstorm, Idea Listing and Grouping

Idea Group	Idea	Purpose / Expected Result
Data Import	Use ServiceNow Load Data and an Import Set staging table for Excel employee data.	Supports the project workflow and data-management objective described in the source.
Field Mapping	Use Auto Map Matching Fields and Mapping Assist to map source fields to Employee Test fields.	Supports the project workflow and data-management objective described in the source.
Duplicate Prevention	Enable Coalesce on Employee ID to update existing records and avoid duplicate insertion.	Supports the project workflow and data-management objective described in the source.
Validation	Check transform status and Transform History for inserted, updated, skipped, or ignored rows.	Supports the project workflow and data-management objective described in the source.
Reporting	Create Employees by Department, Employees by Location, and Employee List reports.	Supports the project workflow and data-management objective described in the source.
Dashboard	Combine the reports into the Employee Analytics Dashboard for centralized visibility.	Supports the project workflow and data-management objective described in the source.

Step-3: Idea Prioritization

Priority Order	Idea	Reason based on source	Priority
1	Data Import + Import Set	Directly enables the core spreadsheet-to-ServiceNow migration workflow.	High
2	Transform Map + Field Mapping	Required to move source fields into the Employee Test target table.	High
3	Coalesce / Duplicate Prevention	Prevents redundant employee records and updates matching records.	High
4	Validation / Transform History	Confirms success and identifies inserted, updated, or ignored rows.	High
5	Reports	Provides department, location, and employee-list views.	Medium
6	Dashboard	Consolidates reports for centralized visibility.	Medium

Note: The prioritization above is a project-workflow prioritization derived from the sequence and dependency of activities in the supplied project document; it is not an external evaluation of alternative products.
