

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-4452
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Customer Problem Statement Template:

The following statements translate the project workflow into the requested customer point of view without adding requirements not described in the source.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Administrator / HR user	I'm trying to import bulk employee data from an Excel spreadsheet into ServiceNow accurately	But repeated imports can contain existing employee records	Because the same employee data may be imported multiple times	Which makes me concerned about duplicate or inconsistent employee records.
PS-2	Administrator / HR user	I'm trying to monitor imported employee data and import results efficiently	But the information is spread across import results, employee records, reports, and validation steps	Because the project requires checking inserted, updated, and ignored records and viewing employee distributions	Which makes centralized visibility important for monitoring data quality.
